

NAGAR DRISHTI (नगर दृष्टि)

Autonomous Transit Edge-AI Urban Intelligence & Municipal Governance Platform

OFFICIAL DEMO VIDEO SCRIPT

🕒 Target: 3m 15s - 3m 30s • ~470 Words

TARGET DURATION
3:15 - 3:30 Mins

NARRATION PACE
135-140 WPM

RECORDING MODE
1080p / 4K (F11 Fullscreen)

VISUAL THEME
Apple Glassmorphism

📽 PHASE-BY-PHASE STORYBOARD & VOICEOVER NARRATIVE

Phase 1: The Civic Problem & The Core Innovation (The Hook)

00:00 - 00:30 (30s)

🖥 WHAT TO SHOW ON SCREEN

- Open on **Dashboard Overview** (DashboardView.tsx).
- Hover over hero pill: "48 DTC AI Transit Nodes Active".
- Showcase real-time **KPI Cards** (Active Fleet, Ingested Detections, Latency 38ms).
- Point to **Live Detection Ticker** updating via WebSocket.

🗣 SPOKEN VOICEOVER SCRIPT

"Every year, hazardous road defects claim thousands of innocent lives across Indian cities. Traditional municipal inspections rely on slow paper surveys or delayed citizen complaint apps that take weeks to resolve.

Welcome to **Nagar Drishti**—an autonomous urban intelligence and municipal governance platform. Instead of deploying expensive dedicated survey vehicles, we transform public transit buses that already navigate every city corridor daily into a live, intelligent road scanning network."

Phase 2: Edge-AI Vision & Live GIS Command Radar

00:30 - 01:05 (35s)

🖥 WHAT TO SHOW ON SCREEN

- Click **Live Map** in top nav (LiveMapView.tsx).
- Show **moving DTC bus markers** along Route 522 & Route 620.
- Toggle **Heatmap layers** (Potholes, Water Logging, Streetlights).
- Click a defect marker: show **10Hz bounding box**, 96% confidence, crater volume (0.28m³).

🗣 SPOKEN VOICEOVER SCRIPT

"Mounted on 48 DTC buses, our custom edge AI vision runs optimized **YOLO-v8 models at 30 frames per second with sub-25ms latency**. As buses drive, onboard cameras automatically detect severe potholes, broken streetlights, water pipeline ruptures, and open manholes.

Telemetry streams in real time over WebSockets to our live GIS radar. **Spatial deduplication** ensures that five buses encountering the same defect generate only one verified municipal incident."

Phase 3: Smart Work Orders & IRC:82 Engineering Standards

01:05 - 01:45 (40s)

🖥 WHAT TO SHOW ON SCREEN

- Open **Tickets & Work Orders** (TicketsWorkOrdersView.tsx).
- Show **Kanban Board** (New → Assigned → In Progress → Resolved).
- Click ticket **TK-8921** to open TicketDetailView.tsx.
- Highlight **IRC:82-2015 Civil SOP**, Bill of Materials, and **Before/After Photo Verification**.

🗣 SPOKEN VOICEOVER SCRIPT

"From detection, Nagar Drishti's auto-routing engine assigns tickets directly to the right department—PWD, Delhi Jal Board, or BSES—under strict SLA countdown timers.

Field crews don't receive vague complaints; they get complete engineering dossiers aligned with official **Indian Road Congress IRC:82 standards**, including required materials and excavation protocols. To eliminate ghost repairs, contractors must upload geotagged **Before-and-After photo audits**, autonomously re-verified the next time a bus passes that exact location."

Phase 4: Multimodal Gemini AI Copilot (Voice & Bilingual)

01:45 - 02:20 (35s)

 WHAT TO SHOW ON SCREEN

- Click floating bottom **"Ask Nagar AI"** (AiCopilotModal.tsx).
- Click prompt: "🚨 1-Hour SLA Breaches" or speak into mic.
- Gemini responds with grounded stats and suggested action pills.
- Click the **Speaker button** for 2-3s of voice output.
- Click *"View Critical SLA Breaches"* to show deep linking.

 SPOKEN VOICEOVER SCRIPT

*"Powering municipal decision-making is our **Multimodal AI Copilot, backed by Google Gemini**. Grounded in Indian civil engineering manuals and emergency protocols, the copilot responds to voice and text queries in both English and Hindi.*

Municipal commissioners can ask for instant SLA breach analyses, material estimations, or crew deployments—with actionable deep links that execute workflows in one click."

Phase 5: Citizen Transit Portal & Multi-Agency War Room

02:20 - 02:55 (35s)

 WHAT TO SHOW ON SCREEN

- Switch role to **Public Commuter** (PublicBusTrackerView.tsx).
- Show Route 522 with live stops, arrival countdowns, and occupancy.
- Open **Cabin Safety SOS** (BusSafetyComplaintsView.tsx).
- Switch to **Multi-Agency Hub** (MultiAgencyView.tsx) showing live war-room chat between PWD, DJB, and Traffic Police.

 SPOKEN VOICEOVER SCRIPT

*"Nagar Drishti empowers citizens as well. Commuters get a public transit portal with live bus ETAs and occupancy tracking. Onboard, passengers have a direct **Cabin SOS to report reckless driving, phone use, or women safety hazards** with CCTV audit logs.*

*Behind the scenes, our **Multi-Agency Coordination Hub** brings PWD, Jal Board, Power utilities, and Traffic Police into a single shared operational room, ending departmental finger-pointing for good."*

Phase 6: Accident Blackspots Analytics & Grand Finale

02:55 - 03:25 (30s)

 WHAT TO SHOW ON SCREEN

- Open **Accident Blackspots** (AccidentBlackspotAnalyticsView.tsx).
- Show Mukarba Chowk & Kashmere Gate fatality metrics.
- Click top **"हिन्दी / EN"** toggle (TopHeader.tsx) to showcase full sovereign Hindi localization.
- Return to the main overview screen with smooth cursor motion as outro plays.

 SPOKEN VOICEOVER SCRIPT

"By coupling historical accident blackspots with continuous pavement defect velocity, city authorities shift from reactive patching to proactive, preventative road safety.

Fully bilingual, privacy-preserving, and built for zero infrastructure capex—Nagar Drishti transforms everyday public transit into the intelligent heartbeat of a self-healing city.

Thank you, and Jai Hind! IN "

CONTINUOUS TELEPROMPTER TEXT (SINGLE-TAKE VOICE RECORDING)

Every year, hazardous road defects claim thousands of innocent lives across Indian cities. Traditional municipal inspections rely on slow paper surveys or delayed citizen complaint apps that take weeks to resolve.

Welcome to **Nagar Drishti**—an autonomous urban intelligence and municipal governance platform. Instead of deploying expensive dedicated survey vehicles, we transform public transit buses that already navigate every city corridor daily into a live, intelligent road scanning network.

Mounted on 48 DTC buses, our custom edge AI vision runs optimized **YOLO-v8 models at 30 frames per second with sub-25ms latency**. As buses drive, onboard cameras automatically detect severe potholes, broken streetlights, water pipeline ruptures, and open manholes. Telemetry streams in real time over WebSockets to our live GIS radar. Spatial deduplication ensures that five buses encountering the same defect generate only one verified municipal incident.

From detection, Nagar Drishti's auto-routing engine assigns tickets directly to the right department—PWD, Delhi Jal Board, or BSES—under strict SLA countdown timers. Field crews don't receive vague complaints; they get complete engineering dossiers aligned with official **Indian Road Congress IRC:82 standards**, including required materials and excavation protocols. To eliminate ghost repairs, contractors must upload geotagged Before-and-After photo audits, autonomously re-verified the next time a bus passes that exact location.

Powering municipal decision-making is our **Multimodal AI Copilot, backed by Google Gemini**. Grounded in Indian civil engineering manuals and emergency protocols, the copilot responds to voice and text queries in both English and Hindi. Municipal commissioners can ask for instant SLA breach analyses, material estimations, or crew deployments—with actionable deep links that execute workflows in one click.

Nagar Drishti empowers citizens as well. Commuters get a public transit portal with live bus ETAs and occupancy tracking. Onboard, passengers have a direct Cabin SOS to report reckless driving, phone use, or women safety hazards with CCTV audit logs. Behind the scenes, our Multi-Agency Coordination Hub brings PWD, Jal Board, Power utilities, and Traffic Police into a single shared operational room, ending departmental finger-pointing for good.

By coupling historical accident blackspots with continuous pavement defect velocity, city authorities shift from reactive patching to proactive, preventative road safety. Fully bilingual, privacy-preserving, and built for zero infrastructure capex—Nagar Drishti transforms everyday public transit into the intelligent heartbeat of a self-healing city. Thank you, and Jai Hind!

VIDEO PRODUCTION & PRESENTATION CHECKLIST

- **Screen Capture:** Press F11 in Chrome for borderless recording. Set zoom strictly to 100%.
- **Audio Balancing:** Keep narration crisp; lower ambient tech background music to -24dB.
- **Cursor Smoothness:** Hover on buttons for 1 second before clicking to let viewers follow.
- **Bilingual WOW-Factor:** Trigger the Hindi toggle at Phase 6 to impress evaluators with sovereign design.
